Subject: Re: Items from OCMB

Update to 3rd item. Just heard that the second FR Notice will publish on Feb 12.

Follow up on Technical Assistance on draft bill amendments to 301(h) for Point Loma WWTP in San Diego

- Written TA comments were sent in last Friday.
- Today, 2/7, OCMB participated in a conference call with Congressional staff. No show stoppers at this point. Region 9 and OGC took lead to get more insight into what San Diego was trying to accomplish. We had participation from OWM and OST as well.

At this point, the ball is back in Rep. Peters' staff court for a redraft. We can expect to be asked for further TA comments on the new draft.

Next step taken with Draft Recommendations document on coastal wetlands

- Per our agreed upon schedule with the agencies that are members of the Interagency Coastal Wetlands Working Group, the draft document was sent out to the coastal EPA Regions (and the equivalent in other agencies) for field office review. Grace sent the request to the Regional wetland managers. We asked for written comments to be sent back to Dominic and Grace in a month's time.

301(h) ICR Status Update

- The package for the 2nd Federal Register Notice for the reinstatement of the 301(h) ICR was forwarded to OP on Monday. Once the FR Notice is cleared and forwarded to the Federal Register for publication (starts a 30-day public comment period), OEI will forward the supporting documents to OMB for review.

303(d) action in Oregon relating to ocean acidification

Deliberative Process / Ex. 5

- OCMB is supporting the Watershed Branch in this discussion.

Status of roll out plans for two ocean acidification products

We are now working with Antonio to develop communication plans. Please know that ORD is pressing for the release of the monitoring guidelines quickly given that they have approved the document within ORD for release. We are on John's calendar next week to tell him about both docs.
